

Door Handles

Measuring a Door Handle

1. Identify Handle Type

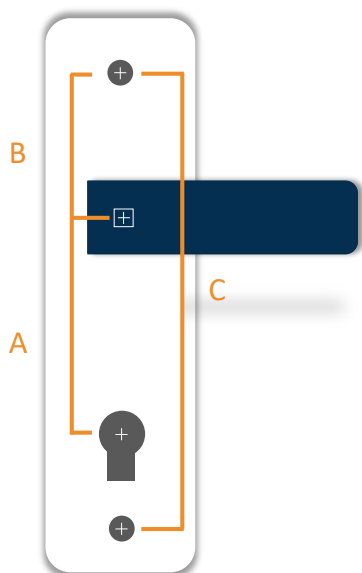

Lever/Lever: Often used on back doors.

Lever/Pad: Often used on front doors.

Lever/Fixed Pad: Looks similar to the lever/pad handle and features a fixed handle on the outside. Only the lever side of the handle can operate the door lock.

2. Measure

A. PZ

Length from spindle centre to the centre of the round part of the key hole (mm).

B. Screw to Spindle

Measure from the centre of the top screw to the centre of the spindle (mm).

C. Screw Holes

Measure top to bottom screw holes, centre to centre (mm).
